francois@homps.fr   
github.com/fhomps   
92130 Issy-les-Moulineaux

## LANGUAGES

French	native
English	bilingual (C2)
Spanish	intermediate (B1)

## SKILLS

**Team work and management**

- Experienced technical tutor
- Practical use of Agile principles

**Computer Science**

- 10+ years of hands-on C++
- Large-scale C++20, C, C# and Python projects
- Contagious Rust enthusiast and regular at the Paris Rust Meetups
- Solid GNU/Linux experience
- Home lab sysadmin

**Robotics**

- Developed 5 autonomous robots

## HOBBIES

**Saxophone**

- Jazz & Swing aficionado with on-stage experience

**Cooking**

- French / Japanese fusion cuisine explorer

**Role-playing games**

- Experienced game master
- Developed my own game system 

# Firmware Engineer

## WORK EXPERIENCE

2024 - current **Eviden** - Les Clayes-sous-Bois  
**Firmware Architect** of the Advanced Computing product line, including HPC servers

- BIOS, BMC & FPGA firmware requirement design and specification (Polarion)
- Technical coordinator of the implementation of modern distributed management technology (Redfish / MCTP / PLDM / SPDML...)
- Initiator and mentor of an internship on advancing open-source standard and implementation of Redfish interoperability profiles

2023 - 2024 **EDF** - Montrouge  
**Product Owner** and **System Architect** of three programming software suites for the control-command automata of nuclear reactors

- Balanced the needs of four different client entities while ensuring compliance with nuclear quality and safety standards

2021 - 2023 **Kickmaker** (on-site subcontractor for **Eviden**) - Paris 15th  
**Firmware Engineer** in BMC coprocessor team of Eviden's HPC R&D division

- OpenBMC GNU/Linux distribution development (Yocto / C / C++ / shell / python)
- Team lead for the kernel and userspace implementation of PLDM, an open-source hardware management standard

2019 **LIRIS** - published at **IEEE VR 2020** international conference   
Research internship: lead programmer and co-author of ReViVD , an interactive visualizer of 3D trajectories in virtual reality

## OTHER PROJECTS

2019 - 2021  
Master's project: ADVISE , machine learning-based software for estimating the landing viability of Martian terrain from aerial pictures in real time

- Subproject: realistic GPGPU terrain generator  based on compute shaders

2018  
Project manager and lead programmer of Centrale Lyon's 14-student team for the national French Robotics Cup

2017 - 2018  
Hardware manager at ÉCLAIR, Centrale Lyon's computer science association

- System administrator of the campus' on-premise networking and cloud servers

2016 - 2017  
CPGE school project: hacked a roomba into an autonomous cartographer robot

## ACADEMIC BACKGROUND

2019 - 2021 **Space Robotics Group - Keio University** - Japan  
Double degree program: Master of Science in Engineering

- Classes focused on low-abstraction computer science and optimization

2017 - 2021 **École Centrale de Lyon** - France  
Multidisciplinary engineering degree from a French Grande École
